Dushyant Jangid

Full Stack Developer(MERN)

I am a full stack developer with experience in both front-end and back-end web development. I have a strong background in HTML, CSS, and JavaScript along with React js and Node js. I am a quick learner and I am always looking to improve my skills. I am a team player and I am always willing to help out other members of the team. I am also a very reliable worker and I always meet deadlines .

PERSONAL PROJECTS

KOPPEE
- KOPPEE is a coffee shop website that provides a user-friendly platform for customers to browse their menu, place orders, and reserve tables online, making the coffee shop experience more convenient and accessible.

Weather App
- weather application is a simple web app that allows users to search for weather conditions in any location in the world. The app uses the OpenWeatherMap API to retrieve weather data, and it is built using React JS

Maths App
- A maths app is a software application designed to help childrens learn and improve their mathematical skills through interactive quizzes.

User Management
- User Management App is a web app that allows users to create, read, update, and delete users. The app is built using Node JS, Express JS, and MongoDB.

WORK EXPERIENCE

Intern
Aeeron Academy

03/2023 - Present   *Jaipur Rajasthan*

Ecommerce App
- Ecommerce Application is a simple and easy-to-use web app that allows users to browse a catalog of products, filter products by category, see the details of any product, add products to their cart, order them, do payment with Braintree, and get a real-time status of their order. The app is built using ReactJS, Bootstrap, NodeJS, MongoDB, and Braintree.
- I started my internship by learning about the company's products and services. I worked on a number of projects, including developing new features for the company's website, fixing bugs, and improving the user experience In addition to learning technical skills, I also learned a lot about working in a team environment.
